SUBORDINATE LEGISLATION ACT 1989

Review of the Lord Howe Island Regulation 2004

Public Comment Invited

THE Subordinate Legislation Act 1989 requires that regulations should be reviewed every five years to consider their ongoing relevance, the need for amendment or the value of non-regulatory alternatives. On behalf of the Minister for the Environment, the Office of Local Government is undertaking a review of the Lord Howe Island Regulation for clarity, effectiveness and consistency with other legislation.

Broadly the Regulation deals with the election of the Lord Howe Island Board; the application and transfer of perpetual leases and annual rent; licensing of tourist accommodation and commercial undertakings; the protection of the environment; motor vehicles and mooring of vessels; and various miscellaneous matters.

A revised draft Lord Howe Island Regulation 2014 has been prepared and all interested persons are invited to comment on the draft Regulation. A Regulatory Impact Statement has also been prepared outlining the costs and benefits associated with the proposed remake of the Regulation, together with a Fact Sheet summarising some of the proposed changes.

Copies of the draft Lord Howe Island Regulation 2014, the Regulatory Impact Statement and the Fact Sheet are available on the Office of Local Government website at www.dlg.nsw.gov.au. These documents may also be obtained by telephoning (02) 4428 4100 or from the Lord Howe Island Board Administration Office, Bowker Avenue, Lord Howe Island.

To make a comment on the proposed Regulation 2014 please write to:

Project Manager
Lord Howe Island Regulation Review
Office of Local Government
Locked Bag 3015
Nowra NSW 2541
Fax: (02) 4428 4199
Email: LHIregreview@dlg.nsw.gov.au

The closing date for submissions is 5.00pm, Friday, 30 May 2014.

* Please note that submissions will be made publicly available.

**REPORT
and
DETERMINATION
of
THE LOCAL GOVERNMENT REMUNERATION TRIBUNAL
under
SECTIONS 239 AND 241
of the
LOCAL GOVERNMENT ACT 1993
24 APRIL 2014**

Introduction

The role of Assessor to the Tribunal (pursuant to section 236 (1) (b) of the Local Government Act 1993) was undertaken by Ms Helen L'Orange from 1 March 2004 until the expiration of her appointment on 11 December 2013. The Tribunal wishes to express its appreciation of Ms L'Orange's contributions over the last several years. This position is currently vacant.

Section 1 Background

1. Pursuant to section 241 of the Local Government Act 1993 (the LG Act) the Local Government Remuneration Tribunal hereby determines in each category of council, the maximum and minimum amount of fees to be paid to mayors and councillors of councils, as well as chairpersons and members of county councils.
2. The Tribunal is also required, pursuant to section 239 of the LG Act, to determine the categories of councils and mayoral offices at least once every 3 years. The Tribunal last undertook a fundamental review of the categories of councils in 2012 and will next consider this matter in 2015.
3. In determining the minimum and maximum fees payable to each of the categories, the Tribunal is required, pursuant to section 242A of the LG Act, to give effect to the same policies on increases in remuneration as those that the Industrial Relations Commission is required to give effect to under section 146C of the Industrial Relations Act 1996, when making or varying awards or orders relating to the conditions of employment of public sector employees.
4. The current policy on wages pursuant to section 146 (1) (a) of the Industrial Relations Act 1996 is articulated in the Industrial Relations (Public Sector Conditions of Employment) Regulation 2011. The effect of the Regulation is that public sector wages cannot increase by more than 2.5 percent, and this includes the minimum and maximum fees payable to councillors and mayors.

Section 2 2013 Review

5. In undertaking the 2013 review the Tribunal noted that a number of initiatives were under way to improve the strength and effectiveness of local government in NSW. These included:
 - the work of the Independent Local Government Review Panel to drive key strategic directions identified in the Destination 2036 initiative
 - the work of the Local Government Acts Taskforce to review the Local Government Act 1993 and the City of Sydney Act 1988
 - the engagement of the NSW Treasury Corporation (TCorp) to report on the financial sustainability of Local Government in NSW.
6. Given the significant work being undertaken by both the NSW Government and local councils to drive and deliver local government reform, the Tribunal did not call for general submissions from individual councils as part of the 2013 Annual Review.
7. The Tribunal's Report and Determination of 2013 provided a general increase of 2.5 percent which was consistent with the NSW Wages Policy. The Tribunal advised that it would monitor the progress of these initiatives over the coming year.

Section 3 2014 Annual Review

8. On 20 January 2014, the Tribunal wrote to all mayors advising of the commencement of the 2014 Annual Review.
9. In writing to mayors the Tribunal noted that the final reports of the Independent Local Government Review Panel and the Local Government Acts Taskforce were released on 8 January 2014. These reports make a series of recommendations for reform, some of which address remuneration for councillors and mayors.
10. At the time of commencing the annual review it was not expected that a decision on, or implementation of, any proposed reforms would be finalised prior to the Tribunal making its determination on or before 30 April 2014. For that reason the Tribunal, as it did in 2013, did not call for general submissions from individual councils for the 2014 review.
11. While general submissions were not requested, councils were welcome to raise with the Tribunal any issues of concern. The Tribunal received two submissions from individual Councils. The submissions sought consideration of the following matters:
 - the Tribunal to determine the maximum statutory increase of 2.5 percent as permitted by the legislation
 - the Tribunal to benchmark mayoral and councillor fees with that of a State Member of Parliament

- the Tribunal to introduce a professional remuneration structure for councillors to improve accountability and performance.
12. The Tribunal also received a submission and met with representatives of Local Government NSW (LGNSW). Given the statutory limitations in place LGNSW has requested that councillor and mayoral remuneration should be increased by the full 2.5 percent for 2013-14.
 13. In addition to requesting the maximum increase of 2.5 percent, LGNSW has sought a professional remuneration structure to ensure that local government attracts appropriately qualified people. LGNSW continues to advocate that elected representatives face increasing challenges, associated with managing council workload, family responsibilities and paid work, and that the significant time involvement is not appropriately recompensed through the current remuneration levels.
 14. LGNSW also provided the Tribunal with an overview of the current reform initiatives and their expected impact on the role and responsibilities of councillors and mayors. The anticipated changes will, in the opinion of LGNSW, warrant a review of the remuneration structure, and a subsequent increase in fees.
 15. The Tribunal wishes to place on record its appreciation to LGNSW for its participation and assistance during the 2014 Annual Review process.

Section 4 Comments

16. The Independent Local Government Review Panel and the Local Government Acts Taskforce make a broad range of recommendations which, if adopted in full or in part, could deliver significant reforms across local government in NSW.
17. The Government has called for public submissions and Councils have been encouraged to provide comment on the final reports of the Panel and the Taskforce by 4 April 2014. The Government has indicated that it will consider the final reports, including submissions received, and prepare its response. That response has not been available to the Tribunal at the date by which it must make its determination for 2014.
18. The Tribunal notes that the Panel has made a number of comments in relation to the adequacy of the existing remuneration arrangements and has proposed structural changes which may have an impact on the roles and responsibilities of councillors and mayors. Suggested changes include amendments to the LG Act to provide greater clarity in relation to the role of councillors and mayors. It has been proposed that in larger councils and in major regional councils, the role of mayor, and in some instances that of the deputy mayor, should be expanded to a full time office and remunerated accordingly. The Panel has also suggested that professional development programs be made available to councillors and that remuneration should be increased in recognition of enhanced skills.
19. In making its determinations the Tribunal is required to have regard to the provisions of the existing LG Act. The LG Act prevents the Tribunal from determining any fees for Deputy Mayors and also requires that the Tribunal apply the Government's wages policy, which currently provides for a cap on increases of 2.5 per cent.
20. The Tribunal currently has regard to the role of councillors and mayors in determining the fees that apply to each of the categories of councils. The existing remuneration model is based on that first determined by the Tribunal in 1995. While there have been adjustments in both the categories of councils and the level of fees, these have not been significant. This in part recognises that the roles and responsibilities of councillors and mayors, as outlined in the legislation, have also not changed significantly since the commencement of the LG Act in 1993, notwithstanding any increases in workload.
21. The Panel has proposed that the roles and responsibilities of councillors and mayors be broadened. These additional functions, if introduced, are likely to have an impact upon the workload, and the skills and capabilities required of elected representatives.
22. The Tribunal continues to support initiatives which will bring about improvements in the local government sector. Further reforms such as council amalgamations and steps to increase resource sharing and joint planning, have previously received and will continue to receive the support of the Tribunal, in that those reforms should result in greater structural efficiencies and should contribute to the long term viability of local government in NSW.
23. The Tribunal will continue to monitor the progress of reform.

Fees

24. The Tribunal is required to have regard to the Government's wages policy when determining the increase to apply to the minimum and maximum fees that apply to councillors and mayors. The public sector wages policy currently provides for a cap on increases of 2.5 per cent.
25. The Tribunal has reviewed the key economic indicators, including the Consumer Price Index and Wage Price Index, and finds that the full increase of 2.5 per cent available to it is warranted. On that basis, having regard to the above, and after taking the views of the Assessor into account, the Tribunal considers that an increase of 2.5 per cent in the fees for councillors and mayors is appropriate and so determines.

About this document

This document is the Environmental Management Calculation Protocol (the Protocol) referred to in clause 10 of the Protection of the Environment Operations (General) Regulation 2009 (the General Regulation) from 1 July 2015. In April 2014, the Protection of the Environment (General) Amendment (Licensing Fees) Regulation 2014 (the Amendment Regulation) was made. The Amendment Regulation introduces changes to the General Regulation progressively from 1 July 2014. The Amendment Regulation also establishes the risk-based licensing framework, including the Protocol, commencing from 1 July 2015. Changes to licence fees apply from 1 July 2016. All references to the General Regulation mentioned in this document commence on 1 July 2015.

The Protocol sets out the matters and methods the Environment Protection Authority (EPA) will use to determine the environmental management category allocated to holders of environment protection licences issued under the *Protection of the Environment Operations Act 1997* (POEO Act).

The environmental management category will be used to calculate the administrative fee to be paid by environment protection licensees in accordance with clause 10 of the General Regulation.

The EPA may vary the Protocol from time to time by notice in the *NSW Government Gazette*.

The Protocol will commence on 1 July 2015.

Glossary

Amendment Regulation	is the Protection of the Environment Operations (General) Amendment (Licensing Fees) Regulation 2014.
Clean up notices	are as set out in Part 4.2 of the POEO Act.
Enforceable undertakings	as referred to in this Protocol are set out in section 253A of the POEO Act. Enforceable undertakings in relation to the <i>Waste Avoidance and Resource Recovery Act 2001</i> , <i>Environmentally Hazardous Chemicals Act 1985</i> and the <i>Ozone Protection Act 1989</i> are excluded from the operation of this Protocol.
Environmental improvement programs	are pollution reduction programs (under section 68 of the POEO Act) that have been initiated by the licensee by way of an application made to the EPA to vary their licence under section 58(3) of the POEO Act. The environmental improvement programs must be programs outside of those required to achieve compliance with legislative requirements under the POEO Act or Regulations or any existing conditions on the licence at the time that the environmental improvement program is added to the licence.
Environmental improvement works	are management measures or works voluntarily completed by the licensee that the EPA considers have led to a demonstrated environmental improvement. Environmental improvement works are described in section 3.2.2 of this Protocol. The environmental improvement works must be outside those works required to achieve compliance with licence conditions or legislative requirements under the POEO Act or Regulations. Environmental improvement works, if completed, are required to be reported in a licensee's annual return.
Environmental Management Calculation Protocol (this document)	sets out the matters and methods the EPA will use to determine the environmental management category allocated to holders of licences issued under the POEO Act.
Environmental management category (A, B, C, D or E)	is allocated to a licence holder based on the licence holder's environmental performance. From 1 July 2015 the environmental management category is used to calculate the administrative fee in accordance with clause 10 of the General Regulation.
Environmental management factors	are listed in the table in clause 10 of the General Regulation (and reproduced as Table 1 of this Protocol). Environmental management factors are the multipliers corresponding to each environmental management category and are used to calculate the licence administrative fee.

Environmental management score	based on licensee compliance history/EPA regulatory response is calculated using the methodology set out in section 3.1 of this Protocol. The environmental management score is the sum of the yearly regulatory score over 3 years.
Environmental management systems and practices	means an environmental management system certified to ISO 14001, and any other systems and practices listed in Table 4 of this Protocol.
Environmental management weighting	listed in Table 2 of this Protocol, is linked to regulatory actions taken over the past 3 years and reflects the significance of the regulatory action taken. The weighting is used to calculate the environmental management score.
Formal warnings	are formal warnings issued for any suspected or potential contravention of the POEO Act or Regulations, including the suspected or potential commission of an offence under the POEO Act or Regulations. Formal warnings issued for any suspected or potential contravention of the <i>Waste Avoidance and Resource Recovery Act 2001</i> , <i>Environmentally Hazardous Chemicals Act 1985</i> and the <i>Ozone Protection Act 1989</i> are excluded from the operation of this Protocol.
General Regulation	is the Protection of the Environment Operations (General) Regulation 2009 as in force from time to time.
Inspections – incident related	<p>are inspections in response to:</p> <ul style="list-style-type: none"> (a) an incident (b) a verified complaint (being a complaint that is verified by the EPA or the licence holder as being directly attributable to the licensed premises) or (c) non-compliance with licence conditions or legislative requirements under the POEO Act or Regulations. <p>It also includes follow up inspections determined by the EPA to be related to the incident, verified complaint or non-compliance</p>
Mandatory environmental audits	are as set out in Part 6.2 of the POEO Act.
Official cautions	are official cautions issued to a licensee for any offence in the POEO Act or Regulations. Official cautions issued for offences under the <i>Waste Avoidance and Resource Recovery Act 2001</i> , <i>Environmentally Hazardous Chemicals Act 1985</i> and the <i>Ozone Protection Act 1989</i> are excluded from the operation of this Protocol. Official cautions for late or non-submission of an annual return are not included in this regulatory action for the purposes of this Protocol.

Official cautions for late or non-submission of an annual return	are official cautions issued to a licensee for the late or non-submission of an annual return, the requirement of which is included as a licence condition under section 64 of the POEO Act.
Penalty notices	are all penalty notices issued by the EPA for offences prescribed by schedule 6 of the General Regulation, with the exception of penalty notices in relation to offences under the <i>Environmentally Hazardous Chemicals Act 1985</i> and the <i>Ozone Protection Act 1989</i> . Penalty notices for late or non-submission of an annual return are not included in this regulatory action for the purposes of this Protocol.
Penalty notices for late or non-submission of an annual return	are penalty notices that are issued for the late or non-submission of an annual return, the requirement of which is included as a licence condition under section 64 of the POEO Act.
POEO Act	is the <i>Protection of the Environment Operations Act 1997</i> .
Pollution reduction programs	are, for the purposes of this Protocol, programs initiated or directed by the EPA to carry out works or to install plant for the purposes of preventing, controlling, abating or mitigating pollution. Pollution reduction programs are imposed on a licensee by the EPA by way of a licence condition under section 68 of the POEO Act.
Prevention notices	are as set out in Part 4.3 of the POEO Act.
Regulations	are any Regulations made under the POEO Act, as in force from time to time.
Successful prosecutions	are where a licensee has been convicted of an offence under the POEO Act 1997 and Regulations. Tier 1 prosecutions are as set out in Part 5.2 of the POEO Act and for the purposes of this Protocol do not include prosecutions for offences under the <i>Ozone Protection Act 1989</i> . Tier 2 prosecutions are as defined in section 114 of the POEO Act, and for the purposes of this Protocol do not include prosecutions for offences under the <i>Waste Avoidance and Resource Recovery Act 2001</i> , <i>Environmentally Hazardous Chemicals Act 1985</i> and the <i>Ozone Protection Act 1989</i> .
Suspension of licence	is as set out in section 79 of the POEO Act.
Total environmental management score	is calculated using the methodology set out in section 3.3 of this Protocol. The total environmental management score is the environmental management score minus the total environmental management score reduction. The total environmental management score is compared to threshold values set out in Table 5 at section 3.4 of this Protocol to determine the environmental management category.

Total environmental management score reduction	is calculated using the methodology set out in section 3.2 of this Protocol. The environmental management score reduction is based on environmental management systems and practices a licensee has in place, environmental improvement programs initiated by the licensee and completed environmental improvement works. The total environmental management score reduction is deducted from the environmental management score.
Year 1	is the most recent licence reporting period (this is generally a 12-month period).
Year 2	is the licence reporting period prior to year 1.
Year 3	is the licence reporting period prior to year 2.
Yearly regulatory score	is calculated using the methodology set out in section 3.1 of this Protocol. The yearly regulatory score is based on a licensee's compliance history for each year considered as part of the risk assessment. The yearly regulatory score is used in calculating the environmental management score.

1. Overview of EPA's risk-based licensing system

The EPA's risk-based licensing system aims to ensure that all licensees receive an appropriate level of regulation based on the level of risk they pose.

The EPA will assess the site-specific risks posed by licensed premises and identify any environmental issues that a licensee needs to address and where the EPA needs to focus its regulatory attention.

The risk assessments will consider three components:

1. the day-to-day operations at the site, assessing the types of environmental media relevant to the premises (air, odour, water and noise emissions)
2. the pollutant incident risk at the premises and
3. the environmental management performance of the licensee.

During the assessment of the first two components, the EPA will take into account:

- the type and nature of emissions from the premises
- pollution control measures used at the premises
- proximity to sensitive environments and receptors (including residences) and
- level of sensitivity of environment and receptors.

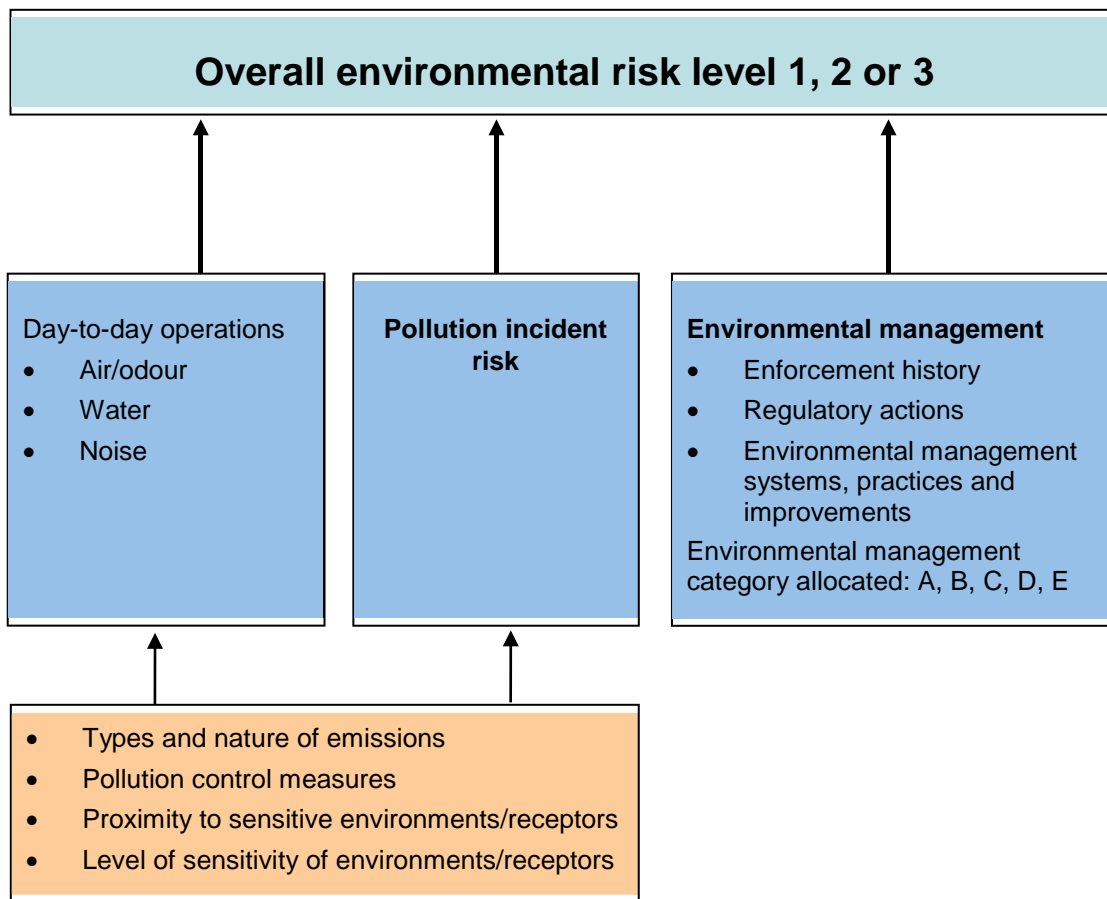

The third component of the assessment examines the environmental management performance of the licensee. The EPA will take into account:

- a licensee's environmental performance based on their compliance history
- the regulatory actions the EPA has taken to respond to incidents and non-compliances
- environmental management systems and practices the licensee has in place to control and mitigate environmental risks and
- environmental improvement programs initiated by the licensee and completed environmental improvement works.

Based on this assessment each licensee will be allocated an environmental management category: A, B, C, D or E.

The results from each of the three components of the risk assessment will be used to determine the environmental risk level for each licence, and each licence will be allocated to one of three risk levels: levels 1, 2 or 3 (with level 3 being the highest risk).

The risk assessments will inform the level and type of EPA regulatory intervention required; for example, a higher risk level may result in more intensive monitoring and reporting obligations on the licence.

The environmental management categories (A, B, C, D or E) allocated to the licensees as part of the third component of the risk assessment process will also be used to calculate the licence administrative fees.

The EPA will determine environmental management categories in accordance with this Protocol.

2. Calculation of licence administrative fees

The General Regulation prescribes licence administrative fees for holders of environment protection licences. Clause 10 in combination with schedule 1 of the General Regulation prescribes these fees based on the type of activity (fee-based activities) and the scale of these activities.

Under clause 10 of the General Regulation licence administrative fees will be calculated based on the type of activity (fee based activities), the scale of these activities, and the environmental management category determined for each licensee. The environmental management category allocated to a licensee corresponds with an environmental management factor. These factors are set out in the table to clause 10 (and in Table 1 of this Protocol). The environmental management factor acts as a multiplier to the administrative fee, resulting in a decrease, increase or no change to the licence administrative fee.

Licensees who perform well and minimise environmental risk will be rewarded with a reduction of their administrative fees. Poor performing licensees will pay licence fees that provide them with an incentive to improve their performance.

Clause 10 of the General Regulation sets out a three-step process for calculating the administrative fee:

Step 1: Calculation of administrative fee units

Multiply the amount of one administrative fee unit for the relevant licence fee period by:

- the number of administrative fee units specified in schedule 1 to the Regulation for the activity authorised or controlled by the licence or
- if the licence authorises or controls more than one activity, the greatest number of administrative fee units specified in schedule 1 for those activities.

Step 2: Determination of the environmental management category

Determine the environmental management category in accordance with this Protocol.

Step 3: Calculation of administrative fee

Multiply the amount calculated in step 1 by the environmental management factor for the applicable environmental management category (step 2).

Table 1 Environmental management categories and corresponding environmental management factors *

Environmental management category	Environmental management factor
A	0.95
B	1
C	1.3
D	1.6
E	2

* Environmental management factors prescribed in clause 10 of the Protection of the Environment Operations (General) Regulation 2009

For a new licence application (section 53(2) of the POEO Act) and for the transport of trackable wastes, only step 1 will apply for the purposes of calculating the administrative fee.

The change in licence administrative fees as set out in the General Regulation and outlined in this document will apply from 1 July 2016.

3. Determining the environmental management category

The EPA will determine the environmental management category for each licensee in accordance with this Protocol based on the following criteria and methodology.

3.1 Calculating the environmental management score based on licensee compliance history/regulatory response

Table 2 sets out the regulatory actions that may be undertaken by the EPA in relation to a licensee's operations, and the environmental management weighting corresponding to that regulatory action based on how long ago the regulatory action occurred. The environmental management weighting is based on a licensee's performance over the past three years.

Regulatory actions taken in the most recent reporting period (i.e. in the past 12 months) will be weighted more heavily than those actions taken in the two years prior. This is reflected in the environmental management weighting, where it is reduced by 50 per cent and 90 per cent where the action occurred in the second and third years, respectively.

Table 2 Regulatory actions, criteria considered and corresponding environmental management weightings

Regulatory actions	Criteria considered	Environmental management weighting
Successful prosecutions Tier 1	Number in year 1	500
	Number in year 2	250
	Number in year 3	50
Successful prosecutions Tier 2	Number in year 1	360
	Number in year 2	180
	Number in year 3	36
Enforceable undertakings	Number in year 1	150
	Number in year 2	75
	Number in year 3	15
Suspension of licence	Number issued in year 1	130
	Number issued in year 2	65
	Number issued in year 3	13
Mandatory environmental audits	Number required in year 1	130
	Number required in year 2	65
	Number required in year 3	13
Penalty notices	Number issued in year 1	120
	Number issued in year 2	60
	Number issued in year 3	12
Penalty notices for late or non-submission of an annual return	Number issued in year 1	60
	Number issued in year 2	30
	Number issued in year 3	6

Regulatory actions	Criteria considered	Environmental management weighting
Official cautions	Number issued in year 1	60
	Number issued in year 2	30
	Number issued in year 3	6
Official cautions for late or non-submission of an annual return	Number issued in year 1	30
	Number issued in year 2	15
	Number issued in year 3	3

	Number issued in year 2	20
	Number issued in year 3	4
Clean-up notices	Number issued in year 1	90
	Number issued in year 2	45
	Number issued in year 3	9
Prevention notices	Number issued in year 1	90
	Number issued in year 2	45
	Number issued in year 3	9
Pollution reduction programs	Number required in year 1	70
	Number required in year 2	35
	Number required in year 3	7
Site inspections – incident related	Number in year 1	20
	Number in year 2	10
	Number in year 3	2

Note: The scheme commences on 1 July 2015 and the calculation of a licensee's environmental management score will initially only consider the licensee's performance in year 1. For the first year of the scheme, year 1 will be the licence reporting period that commences between 1 July 2014 and 30 June 2015. In the second year of the scheme, the licensee's performance in years 1 and 2 will be considered in the calculation of environmental management score. Year 2 will be the licence reporting period that commences between 1 July 2015 and 30 June 2016. For all subsequent years of the scheme a licensee's performance in years 1, 2 and 3 will be used to determine their environmental management category.

The 'trend' in EPA regulatory actions and a licensee's performance over a 3-year period is also considered when determining the environmental management score for licensee compliance history/EPA regulatory response. Where there is a history of poor environmental performance, all regulatory actions for the previous 3 years will be included in the environmental management category calculation. Conversely, where regulatory action is taken in year 3 only (for example), this is not considered to be indicative of a pattern of poor performance – therefore that regulatory action is not included in the environmental management category calculation.

Table 3 specifies when regulatory actions will be included in the environmental management category calculation.

Table 3 Consideration of 'trend' in EPA regulatory actions over a 3-year period

Regulatory action taken			Circumstances in which regulatory action is included in the environmental management category calculation
Year 1	Year 2	Year 3	
X	X	X	Regulatory action taken in each of the past 3 years. This indicates a history of poor environmental management performance. All regulatory actions taken in years 1, 2 and 3 are included in the environmental management category calculation.
X	X		Regulatory action taken in each of the past 2 years. This indicates a trend to poor environmental management performance. All regulatory actions taken in years 1 and 2 are included in the environmental management category calculation.
X			Regulatory action taken in most recent reporting period indicating poor environmental management performance. This is not considered to be indicative of a pattern of poor performance. All regulatory actions taken in year 1 are included in the environmental management category calculation.
X		X	Regulatory action taken in the most recent reporting period but no action taken in the period immediately prior to that. This is not considered to be indicative of a pattern of poor performance. Only the regulatory actions taken in year 1 are included in the environmental management category calculation. The regulatory action in year 3 is not included in the environmental management category calculation.
	X	X	No regulatory action taken in the most recent reporting period but actions taken in the two periods immediately prior to that. This indicates improving environmental management performance. All regulatory actions taken in years 2 and 3 are included in the environmental management category calculation.
	X		No regulatory action taken in the most recent reporting period but actions taken in the period immediately prior to that. This is not considered to be indicative of a pattern of poor performance. No regulatory actions taken in year 2 are included in the environmental management category calculation.
		X	No regulatory action taken in the two most recent reporting periods but action taken in the period immediately prior to those. This indicates improved environmental management performance. No regulatory actions taken in year 3 are included in the environmental management category calculation.
			No regulatory action taken in the past 3 years. This indicates good environmental management performance.

For each year considered the yearly regulatory score will be calculated based on the criteria and weightings outlined in Tables 2 and 3 as follows:

$$\text{Number of regulatory action(s)} \times \text{Environmental management weighting} = \text{Yearly regulatory score}$$

Each yearly regulatory score will then be added to determine the environmental management score for a licensee's compliance history and EPA regulatory response in accordance with Table 3.

$$\text{Yearly regulatory score for year 1} + \text{Yearly regulatory score for year 2} + \text{Yearly regulatory score for year 3} = \text{Environmental management score}$$

3.2 Calculating the total environmental management score reduction

The total environmental management score reduction is based on the:

- environmental management systems and practices a licensee has in place (listed in Table 4)
- environmental improvement works completed in the past 12 months and
- environmental improvement programs specified in the licence.

3.2.1 Licensee environmental management systems and practices

Where a licensee has implemented environmental management systems and practices they will receive a reduction from their total environmental management score. The environmental management systems and practices form one component of the total environmental management score reduction.

The calculation method for determining this score reduction is set out in Table 4. Where a 'No' response is recorded, a nil score is applied. The score reduction is applied for every year in which environmental management systems and practices are in place.

Table 4 Licensee environmental management systems and practices and corresponding score reductions

Licensee environmental systems and practices	Score reduction for 'Yes' response
Does the licensee have an environmental management system (EMS) certified to ISO 14001 or any other demonstrated equivalent system? If yes:	
Has the licensee conformed to their EMS or have licensees rectified all environmental related non-conformances with the EMS?	80
Has the licensee had environmental related non-conformances with the EMS that have not been rectified?	60
If the licensee does not have an environmental management system certified to ISO 14001 or any other demonstrated equivalent system, the following questions should be answered:	
Has the licensee assessed the aspects of their operations and the potential environmental impacts that may result?	18
Does the licensee have any preventative maintenance programs?	12
Are there records of regular inspections and maintenance of pollution control equipment and structures?	6
Does the licensee conduct regular site audits?	7
Are the audits undertaken by a third party?	2
Does the licensee have an environmental improvement or management plan?	12
Are there any records of regular environmental training for staff?	3

3.2.2 Environmental improvement works

If the licensee has voluntarily completed environmental improvement works in the past 12 months that have led to a demonstrated environmental improvement at the licensed premises, the licensee is eligible for their environmental management score to be reduced by 40 for each environmental improvement work completed.

The environmental improvement works undertaken by a licensee must be in addition to those measures or works required to achieve compliance with licence conditions or legislative requirements under the POEO Act or its regulations. In order to receive the score reduction, each environmental improvement work must be reported in a licensee's annual return.

If the EPA subsequently determines that the environmental improvement works:

- have not been undertaken or
- have not been undertaken in the manner reported in the annual return or
- have not lead to a demonstrated environmental improvement

the EPA may add 40 to the environmental management score for the current licence fee period for each incorrectly reported environmental improvement work, and may adjust the administrative fee accordingly if required.

The calculation method for determining the reduction in environmental management score for environmental improvement works is set out in Table 5.

Table 5 Score reduction for environmental improvement works

Action	Criteria considered	Score reduction
Environmental improvement works	Number completed in the past 12 months	40

3.2.3 Environmental improvement programs

The licensee may choose to enter into an environmental improvement program. The agreed environmental improvement program details are attached as a condition to the licence and must be programs outside of those required to achieve compliance with legislative requirements or any existing conditions on the licence as applying at the time the environmental improvement program is entered into.

The licensee must apply to the EPA for a licence variation in order for the programs to be included on the licence, and provide the following information:

- description of program including costs
- proposed completion date
- key reporting milestones and
- details of expected environmental improvements.

The calculation method for determining the reduction to the environmental management score for environmental improvement programs is set out in Table 6. The score reduction is applied in the next licence fee period. The score reduction applies for each environmental improvement program entered into, in accordance with Table 6, below.

The EPA may remove the environmental improvement program from the licence if the key milestones or any other conditions of the environmental improvement program are not met.

If the environmental improvement program is removed from the licence the EPA will add an amount equivalent to the total score reduction received for the environmental improvement program, on to the environmental management score for the following licence fee period.

Table 6 Score reduction for environmental improvement programs

Action	Criteria considered	Score reduction
Environmental improvement programs	Number put in place in year 1	70
	Number put in place in year 2	35
	Number put in place in year 3	7
